Department of Computer Science and Engineering
Shiv Nadar University Chennai
July-November 2026 Semester
M.Tech. Course on Deep Learning
Lab Assignment 6

Date: 28th October, 2026

1. **Build an RNN model with a single hidden layer for sentiment analysis.**
2. **Build an image captioning system using VGGNet as encoder and an RNN with a single hidden layer as decoder.**

Number of the hidden layer nodes in the RNN is 64

GloVe representation is to be used as the word representation.

Performance of the image captioning system is to be given as BLEU@k scores with $k = 1, 2, 3, 4$.

The report should include the classification accuracy for sentiment analysis task. For the image captioning task, the results should include the BLEU scores for the training data and the test data. The report should include the image, ground truth caption(s) and the generated caption for each of any 5 training examples and for each of any 5 test examples.
